EDUCATION

Sahyadri College of Engineering and Management
B.E. in Computer Science Engineering — CGPA: 8.04

Karnataka, India
2023 – 2027

TECHNICAL SKILLS

Languages: C, C++, Java, Python, JavaScript
Core CS: Data Structures & Algorithms, OOP, DBMS
Web: HTML, CSS, React, Bootstrap, Node.js
Database: MySQL, PostgreSQL, MongoDB (Basic)
Tools: Git, GitHub, VS Code, JFLAP
Data Analysis: Python (Pandas), Data Cleaning, Data Visualization, Exploratory Data Analysis (EDA), PowerBi

PROJECTS

HostelOps – Containerized Full Stack Web Application

Technologies: React, Node.js, Express, PostgreSQL, Docker, Nginx

- Developed a containerized full-stack hostel management system using React, Express, and PostgreSQL.
- Configured Nginx reverse proxy to serve frontend assets and forward API requests to backend services.
- Implemented Docker-based microservice architecture with isolated containers and internal networking.
- Applied firewall and port-binding strategies to enhance system security and controlled service exposure.

Smart Ambulance- AI-driven route optimization system for emergency response.

- Developed an AI-driven Smart Ambulance system to optimize emergency response time using intelligent route prediction
- Implemented shortest-path route optimization for ambulances based on real-time traffic and distance factors
- Designed features for hospital selection and faster patient transport through automated decision support
- Enhanced emergency handling efficiency by reducing travel delays and improving response coordination

Academic Management System with Roll Base Access control – Student & Faculty Management Platform.

- Developed an Academic Management System to manage student profiles, and faculty records in a centralized platform
- Implemented mentor allotment module to assign mentors to students based on department and academic details
- Built features for student registration, attendance tracking, marks/grade management, and report generation
- Designed role-based login for Admin, Faculty, and Students to ensure secure access and smooth workflow

BookMyShow-2.0 – Online Movie Ticket Booking Web Application

- Developed a BookMyShow-inspired web application for online movie browsing and ticket booking
- Implemented user authentication, movie listings, seat selection, and booking confirmation features
- Built backend REST APIs to manage users, movies, theatres, and booking transactions
- Integrated database to store booking history, user details, and movie schedules efficiently

CERTIFICATIONS

- Basics of Python – Infosys SpringBoard
- JavaScript Fundamentals

ACHIEVEMENTS

- Finalist – Infotsav Hackathon, IIIT Gwalior (2025)
- Volunteer – Swachhanjali Plogging Drive (NSS)
- Beach-Cleaning Drive at Sasihithlu Beach 2025 (NSS)
- Volunteer – Synergia (Technical Event)
- Participant – Skill Sangam 2025, 24-hour National Hackathon
- TCE – Skill Lab
